Importing the Dependencies

```
import pandas as pd
import numpy as np
from sklearn.preprocessing import StandardScaler
from sklearn.model_selection import train_test_split
from sklearn import svm
from sklearn.metrics import accuracy_score
```

Data Colletion and Preprocessing the Dataset

- PIMA Diabetes Dataset

```
# loading the diabetes dataset to a pandas dataframe

diabetes_dataset = pd.read_csv('/content/diabetes.csv')

diabetes_dataset.head()
```

	Pregnancies	Glucose	BloodPressure	SkinThickness	Insulin	BMI	DiabetesPed
0	6	148	72	35	0	33.6	
1	1	85	66	29	0	26.6	
2	8	183	64	0	0	23.3	
3	1	89	66	23	94	28.1	
4	0	137	40	35	168	43.1	

Next steps: Generate code with `diabetes_dataset` New interactive sheet

```
diabetes_dataset.shape
```

```
(768, 9)
```

```
diabetes_dataset.describe()
```
